20 Nov 83

MEMORANDUM FOR: Director, Intelligence Community Staff

FROM: Harry E. Fitzwater
Deputy Director for Administration

SUBJECT: External Contracts Inventory System

REFERENCE: Memorandum for DDA from D/ICS, dated 28 Nov 83,
Same Subject; DCI/ICS 83-4051 (DDA 83-5010)

A1,

1. I certainly agree with your stated concern but am not sure we can address it as you propose. You may not be aware that our Office of Logistics (OL) is served by an ADP system known as CONIF (Contract Information) which contains much of the information you are seeking. This information is made available to individuals on a "need to know" basis. Security considerations frequently preclude the release of the COTR's name and/or the sponsoring office. In addition, the Agency's association with a particular contractor is often classified at the contractor's request and cannot be revealed to uncleared personnel. Finally, code word project data are also incorporated into the CONIF System and cannot generally be made available.

2. A Top Secret clearance is the minimum required to access the CONIF data base. Special clearances would, of course, be required for code word project data. I believe this to be a major problem precluding the inclusion of CONIF data on the Community Online Intelligence System (COINS) network. However, as the CONIF System is resident on the Office of Data Processing's (ODP) Central Services under the General Information Management System (GIM-II), your staff can obtain access to this data through any ODP standard Delta Data terminal connected to the Central Services in the Ruffing Computer Complex at Headquarters. Before this can happen, your staff must obtain an access request. This appears to meet your major requirement for information from this Agency without additional expenditure of resources.

3. Should additional information be required, [] Assistant
Executive Officer, OL, [] has additional information on CONIF
that might be of interest to members of your staff.
